ClinicalSkills.net Coming Soon for All Clinical Staff

A major expansion of access to ClinicalSkills.net is coming to the Trust, giving all clinical staff access to a comprehensive online resource designed to support safe, effective, evidence-based practice.

ClinicalSkills.net provides over 400 step-by-step clinical skills guides covering a wide range of patient-focused procedures and interventions. The resource is suitable for all clinical staff groups and can be used to support day-to-day practice, learning and development, clinical competency, and continuing professional development (CPD).

As part of a Trust-wide rollout, clinical staff will soon receive an email invitation to activate their account. Once activated, staff will have access to a wealth of up-to-date learning resources, videos, guidance, and best-practice information that can be accessed whenever needed.

The platform can be used to:

- Refresh knowledge and clinical skills
- Support competency assessments and learning
- Access evidence-based guidance
- Support CPD and professional revalidation
- Promote consistent, high-quality patient care

Please look out for your account activation email and take a few moments to activate your access when it arrives.

Please watch the video on clinicalskills.net. Further information and guidance will be shared as the rollout progresses.
