

Date: 30th July 2026

New role specific training launching on ESR

From 1st August, some staff groups will be required to complete new role specific eLearning through ESR.

Martha's Rule eLearning is a one off 20-minute course for all patient facing clinical staff. It introduces Martha's Rule, a national patient safety initiative that helps ensure concerns about patients with acute deterioration are recognised, heard and acted upon promptly. The course explains the three elements of the initiative and how staff can escalate concerns when required.

Healthcare Waste Management and Disposal eLearning is a one off 30-minute course for clinicians and medics responsible for the safe management and disposal of healthcare waste. The training provides guidance on the correct segregation and disposal of clinical waste, supporting infection prevention, environmental legislation and the Trust's sustainability goals.

All relevant staff have been enrolled and the courses will appear on your ESR homepage and under My Learning.

Please complete your allocated training at the earliest opportunity.

For queries about Martha's Rule, contact jennifer.merritt4@nhs.net.

For queries about Healthcare Waste Management and Disposal, contact anthonyjones@nhs.net.

For general queries about ESR training, contact wih-tr.mandatorytraining@nhs.net.
